List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 123 ^a		
Cancer site	Carcinogenic agents with sufficient evidence in humans	Agents with <i>limited evidence</i> in humans
Lip, oral cavity, and	l pharynx	
Lip		Hydrochlorothiazide Solar radiation
Oral cavity	Alcoholic beverages Betel quid with tobacco Betel quid without tobacco Human papillomavirus type 16 Tobacco, smokeless Tobacco smoking	Human papillomavirus type 18
Salivary gland	X-radiation, gamma-radiation	Radioiodines, including lodine-
Tonsil	Human papillomavirus type 16	
Pharynx	Alcoholic beverages	Asbestos (all forms)
	Betel quid with tobacco	Printing processes
	Human papillomavirus type 16	Tobacco smoke, secondhand
	Tobacco smoking	
Nasopharynx	Epstein-Barr virus	
	Formaldehyde	
	Salted fish, Chinese-style	
	Tobacco smoking	
	Wood dust	
Digestive tract, upper	Acetaldehyde associated with consumption of alcoholic beverages	
Digestive organs		
Oesophagus	Acetaldehyde associated with consumption of alcoholic beverages Alcoholic beverages	Dry cleaning Pickled vegetables (traditional Asian)
	Betel quid with tobacco	Rubber production industry
	Betel quid without tobacco	Very hot beverages (squamous
	Tobacco, smokeless	cell carcinoma)
	Tobacco smoking	
	X-radiation, gamma-radiation	

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 123 a		
Cancer site	Carcinogenic agents with sufficient evidence in humans	Agents with <i>limited evidence</i> in humans
Stomach	Helicobacter pylori Rubber production industry Tobacco smoking X-radiation, gamma-radiation	Asbestos (all forms) Epstein-Barr virus Lead compounds, inorganic Nitrate or nitrite (ingested) under conditions that result in endogenous nitrosation Pickled vegetables (traditional Asian) Salted fish, Chinese-style Processed meat (consumption of)
Colon and rectum	Alcoholic beverages Tobacco smoking X-radiation, gamma-radiation Processed meat (consumption of)	Asbestos (all forms) Schistosoma japonicum Red meat (consumption of)
Anus	Human immunodeficiency virus type 1 Human papillomavirus type 16	Human papillomavirus types 18, 33
Liver and bile duct	Aflatoxins Alcoholic beverages Clonorchis sinensis 1,2-Dichloropropane Estrogen-progestogen contraceptives Hepatitis B virus Hepatitis C virus Opisthorchis viverrini Plutonium Thorium-232 and its decay products Tobacco smoking (in smokers and in smokers' children) Vinyl chloride	Androgenic (anabolic) steroids Arsenic and inorganic arsenic compounds Betel quid without tobacco DDT Dichloromethane (Methylene chloride) Human immunodeficiency virus type 1 Schistosoma japonicum Trichloroethylene X-radiation, gamma-radiation
Gall bladder	Thorium-232 and its decay products	
Pancreas	Tobacco, smokeless Tobacco smoking	Alcoholic beverages Thorium-232 and its decay products X-radiation, gamma-radiation Red meat (consumption of)

Carcinogenic agents with sufficient	
evidence in humans	Agents with <i>limited evidence</i> in humans
	Radioiodines, including lodine-
sopropyl alcohol production Leather dust Vickel compounds Radium-226 and its decay products Radium-228 and its decay products Tobacco smoking Vood dust	Carpentry and joinery Chromium(VI) compounds Formaldehyde Textile manufacturing
Acid mists, strong inorganic Alcoholic beverages Asbestos (all forms)	Human papillomavirus type 16 Rubber production industry Sulfur mustard Tobacco smoke, secondhand
Acheson process, occupational exposures associated with Aluminum production Arsenic and inorganic arsenic compounds Asbestos (all forms) Beryllium and beryllium compounds Bis(chloromethyl)ether; chloromethyl methyl ether (technical grade) Cadmium and cadmium compounds Chromium(VI) compounds Coal, indoor emissions from household combustion Coal gasification Coal-tar pitch Coke production Engine exhaust, diesel Hematite mining (underground) ron and steel founding MOPP (vincristine-prednisone-nitrogen mustard-procarbazine mixture)	Acid mists, strong inorganic Art glass, glass containers and pressed ware (manufacture of) Benzene Biomass fuel (primarily wood), indoor emissions from household combustion of Bitumens, occupational exposure to oxidized bitumens and their emissions during roofing Bitumens, occupational exposure to hard bitumens and their emissions during mastic asphalt work Carbon electrode manufacture alpha-Chlorinated toluenes and benzoyl chloride (combined exposures) Cobalt metal with tungsten carbide Creosotes
e — enverse variable and second contractions of the contraction of the	copropyl alcohol production eather dust ickel compounds adium-226 and its decay products adium-228 and its decay products obacco smoking /ood dust cid mists, strong inorganic lcoholic beverages sbestos (all forms) obacco smoking cheson process, occupational exposures associated with luminum production rsenic and inorganic arsenic compounds sbestos (all forms) eryllium and beryllium compounds is(chloromethyl)ether; chloromethyl methyl ether (technical grade) admium and cadmium compounds hromium(VI) compounds oal, indoor emissions from household combustion oal gasification oal-tar pitch oke production ngine exhaust, diesel ematite mining (underground) on and steel founding IOPP (vincristine-prednisone-nitrogen

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 123 and a site of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in		
Cancer site	Carcinogenic agents with sufficient evidence in humans	Agents with <i>limited evidence</i> in humans
	Painting Particulate matter in outdoor air pollution Plutonium Radon-222 and its decay products Rubber production industry Silica dust, crystalline Soot Sulfur mustard Tobacco smoke, secondhand Tobacco smoking Welding fumes X-radiation, gamma-radiation	Diazinon Fibrous silicon carbide Frying, emissions from high- temperature Hydrazine Insecticides, non-arsenical, occupational exposures in spraying and application Printing processes 2,3,7,8-Tetrachlorodibenzo- para-dioxin
Bone, skin, and me	sothelium, endothelium, and soft tissu	le
Bone	Plutonium Radium-224 and its decay products Radium-226 and its decay products Radium-228 and its decay products X-radiation, gamma-radiation	Radioiodines, including Iodine- 131
Skin (melanoma)	Solar radiation Ultraviolet-emitting tanning devices Polychlorinated biphenyls	
Skin (other malignant neoplasms)	Arsenic and inorganic arsenic compounds Azathioprine Coal-tar distillation Coal-tar pitch Cyclosporine Methoxsalen plus ultraviolet A Mineral oils, untreated or mildly treated Shale oils Solar radiation Soot X-radiation, gamma-radiation	Creosotes Human immunodeficiency virus type 1 Human papillomavirus types 5 and 8 (in patients with epidermodysplasia verruciformis) Hydrochlorothiazide Nitrogen mustard Petroleum refining, occupational exposures Ultraviolet-emitting tanning devices Merkel cell polyomavirus (MCV)

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 123°		
Cancer site	Carcinogenic agents with sufficient evidence in humans	Agents with <i>limited evidence</i> in humans
Mesothelium (pleura and peritoneum)	Asbestos (all forms) Erionite Fluoro-edenite Painting	
Endothelium (Kaposi sarcoma)	Human immunodeficiency virus type 1 Kaposi sarcoma herpes virus	
Soft tissue		Polychlorophenols or their sodium salts (combined exposures) Radioiodines, including iodine-131 2,3,7,8-Tetrachlorodibenzo-
Breast and female	genital argans	<i>para</i> -dioxin
Breast	Alcoholic beverages Diethylstilbestrol Estrogen-progestogen contraceptives Estrogen-progestogen menopausal therapy X-radiation, gamma-radiation	Dieldrin Digoxin Estrogen menopausal therapy Ethylene oxide Polychlorinated biphenyls Shiftwork that involves circadian disruption Tobacco smoking
Vulva	Human papillomavirus type 16	Human immunodeficiency virus type 1 Human papillomavirus types 18, 33
Vagina	Diethylstilbestrol (exposure in utero) Human papillomavirus type 16	Human immunodeficiency virus type 1
Uterine cervix	Diethylstilbestrol (exposure in utero) Estrogen-progestogen contraceptives Human immunodeficiency virus type 1 Human papillomavirus types 16, 18, 31, 33, 35, 39, 45, 51, 52, 56, 58, 59 Tobacco smoking	Human papillomavirus types 26, 53, 66, 67, 68, 70, 73, 82

List of Classifi humans, Volui	cations by cancer sites with <i>sufficie</i> mes 1 to 123 ^a	nt or <i>limited evidence</i> in
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Endometrium	Estrogen menopausal therapy	Diethylstilbestrol
	Estrogen-progestogen menopausal therapy	
	Tamoxifen	
Ovary	Asbestos (all forms) Estrogen menopausal therapy	Talc-based body powder (perineal use)
	Tobacco smoking	X-radiation, gamma-radiation
Male genital org		
Penis	Human papillomavirus type 16	Human immunodeficiency virus type 1
		Human papillomavirus type 18
Prostate		Androgenic (anabolic) steroids
		Arsenic and inorganic arsenic compounds
		Cadmium and cadmium compounds
		Malathion
		Rubber production industry
		Thorium-232 and its decay products
		X-radiation, gamma-radiation
		Red meat (consumption of)
Testis		DDT
		Diethylstilbestrol (exposure in utero)
		N,N-Dimethylformamide
		Perfluorooctanoic acid

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 123 ^a		
Cancer site	Carcinogenic agents with <i>sufficient</i> evidence in humans	Agents with <i>limited evidence</i> in humans
Urinary tract		
Kidney	Tobacco smoking X-radiation, gamma-radiation Trichloroethylene	Arsenic and inorganic arsenic compounds Cadmium and cadmium compounds Perfluorooctanoic acid
		Printing processes Welding fumes
Renal pelvis and ureter	Aristolochic acid, plants containing Phenacetin Phenacetin, analgesic mixtures containing Tobacco smoking	Aristolochic acid
Urinary bladder	Aluminum production 4-Aminobiphenyl Arsenic and inorganic arsenic compounds Auramine production Benzidine Chlornaphazine Cyclophosphamide Magenta production 2-Naphthylamine Painting Rubber production industry Schistosoma haematobium Tobacco smoking ortho-Toluidine X-radiation, gamma-radiation	4-Chloro- <i>ortho</i> -toluidine Coal-tar pitch Dry cleaning Engine exhaust, diesel Hairdressers and barbers, occupational exposure 2-mercaptobenzothiazole Pioglitazone Printing processes Soot Textile manufacturing Tetrachloroethylene
Eye, brain, and ce	Human immunodeficiency virus type 1 Ultraviolet-emitting tanning devices Ultraviolet emissions from welding	Solar radiation
Brain and central nervous system	X-radiation, gamma-radiation	Radiofrequency electromagnetic fields (including from wireless phones)

List of Classifications by cancer sites with <i>sufficient</i> or <i>limited evidence</i> in humans, Volumes 1 to 123 a			
Cancer site	Carcinogenic agents with sufficient evidence in humans	Agents with <i>limited evidence</i> in humans	
Endocrine glands			
Thyroid	Radioiodines, including lodine-131		
	X-radiation, gamma-radiation		
Lymphoid, hemato	poietic, and related tissue		
Leukaemia and/or	Azathioprine	Benzene ^b	
lymphoma	Benzene ^b	Bischloroethyl nitrosourea	
	Busulfan	(BCNU)	
	1,3-Butadiene	Chloramphenicol	
	Chlorambucil	DDT	
	Cyclophosphamide	Diazinon	
	Cyclosporine	Dichloromethane (Methylene	
	Epstein-Barr virus	chloride)	
	Etoposide with cisplatin and bleomycin	Ethylene oxide	
	Fission products, including Strontium-90	Etoposide	
	Formaldehyde	Glyphosate	
	Helicobacter pylori	Hepatitis B virus	
	Hepatitis C virus	Magnetic fields, extremely low frequency (childhood	
	Human immunodeficiency virus type 1	leukaemia)	
	Human T-cell lymphotropic virus type 1	Malathion	
	Kaposi sarcoma herpes virus	Mitoxantrone	
	Lindane	Nitrogen mustard	
	Melphalan MOPP (vincristine-prednisone-nitrogen	Painting (childhood leukaemia from maternal exposure)	
	mustard-procarbazine mixture)	Petroleum refining,	
	Pentachlorophenol	occupational exposures	
	Phosphorus-32	Polychlorinated biphenyls	
	Rubber production industry	Polychlorophenols or their	
	Semustine (methyl-CCNU)	sodium salts (combined exposures)	
	Thiotepa Thorium-232 and its decay products	Radioiodines, including lodine-	
	Tobacco smoking	Radon-222 and its decay	
	Treosulfan	products	
	X-radiation, gamma-radiation	Styrene	
		Teniposide	
		Trichloroethylene	

List of Classifica humans, Volume	ations by cancer sites with <i>sufficient</i> es 1 to 123 ^a	t or <i>limited evidence</i> in
Cancer site	Carcinogenic agents with sufficient evidence in humans	Agents with <i>limited evidence</i> in humans
		2,3,7,8-Tetrachlorodibenzo- para-dioxin
		Tobacco smoking (childhood leukaemia in smokers' children)
		Malaria (caused by infection with <i>Plasmodium</i> falciparum in holoendemic areas)
Multiple or unspe	cified sites	
Multiple sites (unspecified)	Cyclosporine	Chlorophenoxy herbicides
	Fission products, including strontium-90	Plutonium
	X-radiation, gamma-radiation (exposure in utero)	
All cancer sites (combined)	2,3,7,8-Tetrachlorodibenzo- <i>para</i> -dioxin	
1 _		

^a This table does not include factors not covered in the *IARC Monographs*, notably genetic traits, reproductive status, and some nutritional factors.

Adapted from Table 4 in Cogliano *et al.* (2011) available at: http://jnci.oxfordjournals.org/content/early/2011/12/11/jnci.djr483.short?rss=1

Last update: 2 November 2018

^b For benzene, the evidence in humans is sufficient for acute non-lymphocytic leukaemia, including acute myeloid leukaemia; and the evidence in humans is limited for non-Hodgkin lymphoma, chronic lymphoid leukaemia, multiple myeloma, chronic myeloid leukaemia, and acute myeloid leukaemia in children
